## CRA Summer Studentship Programs

**There is a high demand for Rheumatologists in Canada.  
The CRA Summer Studentship programs are an excellent way for  
medical students to gain experience and be introduced  
to the world of Rheumatology.**

*The CRA offers two exciting programs  
which expose medical students to  
both clinical and research settings:*

### Clinical Summer Studentship

...an experiential program of clinical exposure

### Research Summer Studentship

...a basic or translational research opportunity

***Learn skills that you can use throughout your medical career!***

What recent summer students have to say about their experience...

*The CRA Clinical Studentship has been an unparalleled opportunity that has allowed me to gain exposure to the world of rheumatology, gain valuable clinical experiences, participate in formal education and research, and work with fantastic mentors that continue to guide me.*

*Thanks to my preceptor, I can say that I fell in love with rheumatology, and plan on seizing any opportunity I have to invest myself in the field.*

*Every day was a new learning experience, I learned so much more than I would ever have obtained from a textbook.*

*My mentor supported my growth as a budding rheumatologist through the provision of priceless opportunities, academic and clinical guidance, and a strong desire to provide me with a learner-friendly environment.*
